

m = 1
best-found gain = 2.35

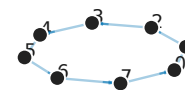

Cycle

m = 2
exact gain = 1.00

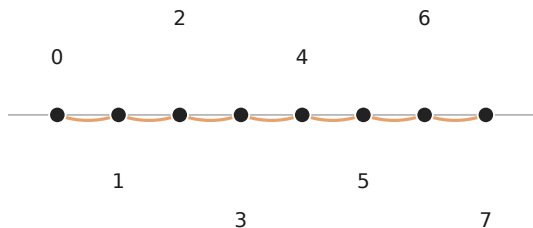

m = 3
exact gain = 1.00

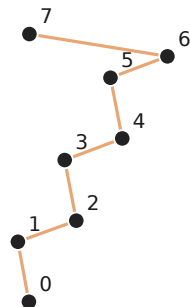

best-found gain = 3.21

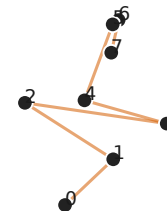

Adjacent
transpositions

best-found gain = 1.56

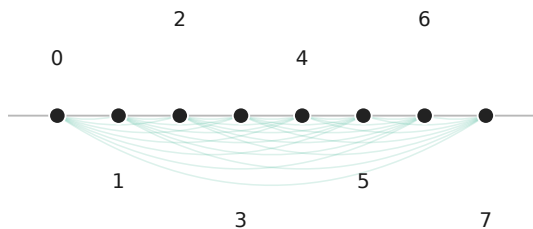

best-found gain = 1.31

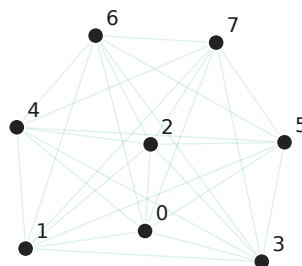

best-found gain = 5.54

Complete
transpositions

each edge denotes one
transposition action

best-found gain = 2.32

best-found gain = 1.56

Same states, higher dimension -> more flexible geometry -> lower required gain
